### JBL EON USED ON IBIZA-BOUND G-WIZ GIG

IBIZA – July 9, 2003 – Arbiter Pro Audio have provided GoinGreen with a pair of powered JBL EON15 G2 portable speakers for the G-Wiz tour around Ibiza. The G-Wiz’s debut gig was on Thursday, July 3<sup>rd</sup> at the Townhouse in Leeds.

Leeds duo Tim Sheridan and GoinGreen are teaming up this summer in Ibiza to launch the world’s first green, all electric, mobile gigs. A series of exclusive “underGround” parties will take place around the Island with the G-Wiz and its 400-watt DJ station as the focus of attention. Tim will also be driving the black G-Wiz complete with state of the art sound system to his weekly residencies at Manumission and Space.

Steven Cain, co-founder of GoinGreen added “the opportunity to link up with Tim and enable hundreds of thousands of young people from all over Europe to see and hear the G-Wiz in action was too good to miss - with a funky design and low price the G-Wiz could help them make a difference to the environment back home. We look forward to turning the White Isle Green!”

The second generation of JBL Professional EON® Speakers, the best selling powered speakers in pro audio history, includes the EON10 G2 compact powered speaker, EONSUB G2 powered subwoofer, and EON G2 Systems featuring the EON15 G2 and EON10 G2 powered speakers and new, improved mixers.

JBL EONG2 speakers used on G-Wiz Ibiza tour.

---

The EON10 G2 has the same appearance improvements as its larger companion EON15 G2, including new black exterior material and a mini-mixer with three inputs. The EON10 G2 also features increased power with 125 watts for low frequencies and 50 watts for the highs. A perfect companion for the EON10 G2 is the new EONSUB G2 powered subwoofer. Consistent in design with other EON G2 models, the EON SUB G2, with its 15” transducer, has 250 watts of low-end power, JBL’s patented Neodymium Differential Drive® woofer design, Thermomaster® cooling system and a new low price. The EONSUB G2 was specifically designed to hold the EON10 G2 using receptacles built into the top of the SUB.
