INTERNALLY SOUND "SAFE AT HOME" WITH JBL PROFESSIONAL VRX SERIES FOR BASEBALL STADIUM EVENT

VRX932LA speakers used for Christian event
held at Legends Field in Tampa, FL

NORTHRIDGE, CALIFORNIA, June 30, 2005 — In a unique application that demonstrates the versatility and power of the JBL VRX portable line array series, Internally Sound of Milan, TN recently supplied a full audio system for "Safe At Home," a Christian evangelical event held at Legends Field in Tampa, FL. Hosted by the Scott Dawson Evangelistic Association on April 24, 2005, "Safe at Home" immediately followed a Tampa Yankees minor league baseball game, making quick setup of the PA system crucial to the success of the event.

To expedite the setup process, co-owners Phil and Mark Jenkins of Internally Sound arranged eight mobile carts, each containing two JBL VRX932LA speakers set on top of a single SRX728 portable PA speaker. "Having a normal stage setup doesn't quite work with this type of setting, because our goal is to have the audio immediately up and running before the people in the stands are out of the stadium," Phil Jenkins said.

In addition to the custom-made carts, Internally Sound also specially designed a one-piece stage that quickly unfolds. This was the company's fourth Safe At Home event, and the combination of versatile technology and ingenuity has dramatically reduced the setup with each successive production. "We did our first Safe At Home before we purchased the VRX system, and we had everything ready to go in about 20 minutes," Phil added. "This time, the stage was set in six minutes, but we had everything in place with music playing and the minister speaking over the PA in two minutes and 20 seconds. The baseball players had to dodge us!"

- more -

Ideal for smaller environments requiring line array performance without the long-throw characteristics of larger systems, the VRX932LA is a compact 12-inch, two-way line array loudspeaker designed for use in arrays of up to six units. Each speaker has a 15-degree (nominal) vertical coverage angle. This enables small arrays consisting of 2 or 3 speakers, or even a single enclosure, to provide practical vertical coverage in many situations.

About JBL Professional:

Headquartered in Northridge, California, JBL Professional is the world's leading designer, manufacturer, and marketer of professional loudspeakers for recording and broadcast, musician, cinema, touring sound, commercial sound and contracting applications. JBL Professional is part of the Harman International network of professional and consumer audio companies.
