JBL Professional Introduces Control 25AV-LS Loudspeaker For Life Safety Applications

NORTHRIDGE, California – Delivering added functionality for applications where audio is critical to security and safety, JBL Professional has introduced the new Control 25AV-LS loudspeaker. Designed for applications where the music playback loudspeaker system also serves as the life safety system, the Control 25AV-LS (and the Control 25AV-LS-WH in white) is UL listed under UL1480/UUMW as a Fire Protective Signaling Speaker.

With powerful and highly consistent performance, the Control 25AV-LS is based on the successful Control 25AV loudspeaker. Like the Control 25AV, Control 25AV-LS features a 60W multi-tap transformer with 8 ohm bypass, InvisiBall mounting and a magnetically shielded woofer. With the Control 25AV-LS, system integrators now have a model for fire alarm, voice evacuation, or life-safety applications requiring a professional-quality compact loudspeaker, as well as for other applications where code may require that surface mount speakers carry a UL Listing.

The new JBL Control 25AV-LS loudspeaker is designed for life safety functions as well as music playback.

“Because we were able to develop the Control 25AV-LS from an existing model in our product lineup, JBL was able to deliver this new loudspeaker to the market very quickly,” said Rick Kamlet, Senior Director, Commercial Installed Sound, JBL Professional. “However, no shortcuts were taken, as the Control 25AV-LS successfully withstood a rigorous safety agency approval process.”

The Control 25AV-LS features a paintable aluminum grille. Coating the woofer in polypropylene and terminating its circumference in JBL’s WeatherEdge™ a seamless, butyl rubber extension of the woofer surround, protects critical transducer elements. The polycarbonate tweeter diaphragm is reinforced with a thin film of titanium for added rigidity and endurance. Nickel/zinc rust-resistant terminals ensure a secure input connection. JBL’s exclusive SonicGuard overload protection is virtually inaudible to the listener, ensuring reliability while providing full fidelity sound.

JBL is a unit of Harman International Industries, Incorporated (www.harman.com). Harman International Industries, Incorporated designs, manufactures and markets a wide range of audio and infotainment products for the automotive, consumer and professional markets. Harman International maintains a strong presence in the Americas, Europe and Asia, and employs more than 11,000 people worldwide. The Harman International family of brands includes AKG®, Audioaccess®, Becker®, BSS®, Crown®, dbx®, DigiTech®, Harman Kardon®, Infinity®, JBL®, Lexicon®, Mark Levinson®, Revel®, QNX®, Soundcraft® and Studer®. Harman International’s stock is traded on the New York Stock Exchange under the symbol “NYSE: HAR.”
