### JBL PROFESSIONAL ANNOUNCES AVAILABILITY OF VENUE PERFORMANCE SERIES ACCESSORIES

---

SAN FRANCISCO, CALIFORNIA, October 6, 2006 — Rounding out its successful VP (Venue Performance) Series loudspeaker product line, JBL Professional is announcing that a wide range of accessories to complement the VP Series is now available. The accessories include products designed to enable easy rigging, transportability and protection.

“Since its introduction in January, the VP Series has proven to be a powerful and versatile solution for a variety of sound reinforcement applications,” said Ted Leamy, Vice President, Installed Sound, JBL Professional. “Now, with the full complement of accessories available, end-users can further benefit from JBL’s dedication to quality and convenience.”

Included among the line of accessories is a padded cover for various VP Series models, as well as dolly wheel-boards for easy transporting. Additionally, numerous accessories, including Planar Array Kits and U-Brackets, are available for simple and thorough suspension of individual or multiple units. JBL offers a Planar Array Kit for rigging two VP7212 loudspeakers under one VPSB7118 subwoofer system in a vertical array. Another Planar Array Kit is offered for rigging one VPSB7118 subwoofer system with a VP7212 loudspeaker system on each side in a horizontal array.

The JBL VP Series loudspeaker systems incorporate JBL’s time-proven transducer technologies and innovative system engineering integrated with Crown’s patented amplifier technology. All six models of the VP Series are optimized for applications where multiple individual loudspeakers are required for a distributed system or where multiple loudspeakers will be configured into arrays for point-source clusters. Each system features a JBL DrivePack® integrated electronics module, designed in coordination with Crown. Network control and monitoring is enabled by the JBL device control panel supplied within Harman *HiQnet System Architect* software.

**JBL Professional is providing a comprehensive line of accessories to complement the VP Series powered loudspeakers.**
